Personal Projects

Tiltle : CountriesAPI, Live-Link ⬈	07/2023 – 10/2023

Technologies Used - ReactJS, Tailwind CSS, RestAPI

- This project showcases a responsive website fetching country data from a REST API using React.js and Tailwind CSS.
- Key features include search functionality, filtering by region, and a toggle for dark/light mode, ensuring a dynamic and user-friendly experience. Built as a Frontend Mentor challenge, it emphasizes interactive and modern UI design.

Title : Image-wiz, Live-Link ⬈	02/2024 – 03/2024

Technologies Used - NextJS, CSS5, Bootstrap

- Web-ImageWiz is an individual Project. Basically it is a website in which we can apply various filters like hue, contrast, opacity etc. to image and user can find the perfect values.
